OBSERVED THE WORLD AIDS DAY ON THE 1ST OF DECEMBER 2022

REPORT OF WORLD AIDS DAY

End inequalities. End AIDS. End pandemics

1STDecember 2022

A BRIEF REPORT

WORLD AIDS DAY

Every year, on 1 December, the world commemorates World AIDS Day. People around the world unite to show support for people living with and affected by HIV and to remember those who lost their lives to AIDS.

Aids can be prevented and also controlled by understanding the causes and the underlying treatment for the same. As per the latest report there has been a surge in the positive patients affected with AIDS especially after the Covid Pandemic. To bring awareness in this concern the Youth Red cross unit thought of promoting awareness regarding AIDS not only to the students but the public at large. In connection with this a rally was organized from the college campus to the Bus stand and back. Students shouted slogans and raised playcards showing the protective measures, preventive measures for AIDS. The rally was a great success and was appreciated by the public at large. Dr. Archana Naik the head of the Primary Health care centre Belse flagged off the rally and addressed the students in the campus.
